

BQ-P6

Binding System

The BQ-P6 Document Binding System from Standard is an exceptionally versatile and productive desktop binder with the unique ability to produce three popular types of binding: wrap-around perfect binding, tape binding and note-pad binding. With push button simplicity, each of these three binding types is easily produced in less than 30 seconds. The multi-functional BQ-P6 brings desktop document binding to a new level of versatility, speed and quality...on demand.

- *Multi-functional binder*
- *Fast binding speeds*
- *Simple desktop operation*

BQ-P6

The BQ-P6 from Standard is an exceptional desktop document binding system. It is easy to operate, highly productive and uniquely versatile. With the push of a button bind from 2 to 250 sheets for just pennies a bind. The BQ-P6's three binding types include wrap-around perfect binding for a professional quality appearance, tape binding for reports and note-pad binding. Designed for the short run/on-demand market, the BQ-P6 is the ideal binding machine for today's quick printers, in-plants, offices, churches, schools and more.

The cycle speed of the BQ-P6 is up to 140 books per hour with an average operator producing 80 to 120 books per hour. The operator simply places cover stock or tape onto the machine and the adhesive application and spine clamping are automatic. The BQ-P6's easy operation produces a strong, square bind every time.

Whether for reports, sales presentations, proposals, annual reports, personalized pads or any number of other applications, the BQ-P6 will create attractive, strong and economical binds. No other binding system can deliver so many binding solutions — on demand.

Perfect Binding

Books up to 1" thick are perfect bound with a square, professional finish, which can be further enhanced with spine printed covers.

Padding

Pads up to 1" thick can be produced in less than 30 seconds or produce up to 480 1/4" thick note pads per hour.

Simple Operation

The BQ-P6 control panel steps the user through the simple binding procedure. Thermostatically controlled, the BQ-P6 indicates readiness to bind with a ready light and audible tone. The type of bind is chosen with a press of a button, and a sequence of four indicators directs the user through the binding process. The BQ-P6 is easy to use and more productive than comb or wire binding operations which require punching and assembly.

Consistent Quality

The push button operation of the BQ-P6 allows for consistent, high quality professional binds each and every time.

Customize With Stocks & Colors

A wide variety of cover stocks for both perfect binding and tape binding applications can be used due to the unique strength and flexibility of the BQ-P6 binding adhesive. An assortment of tape colors are available to produce a customized professional report appearance.
